Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 May 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Schneider et al. (Great Britain patent 1,115,636).

Schneider discloses a method for manufacturing an inherently stable container made of flexible material comprising the steps of folding a continuous film of flexible material of appropriate width to obtain a pouch by way of a longitudinal heat seal (Fig. 10, via 30) and by way of evenly spaced transverse heat seals (Fig. 10, via 34), followed by cropping the folded film transversely; heat sealing in sides of the pouch at a region of the transverse heat seals, ^{forming} two triangles, ^{making wings} each of which has a base which coincides with one edge of the pouch and a vertex which wedges inwards said pouch (Fig. 12, via 38); punch opening said pouch and optionally filling the pouch with a product (Figs. 10 and 11); folding and bonding the wings ^{laterally} ~~without an~~ ^(Figs. 10-13 we heat seal 30) ~~intermediate step that form adjacent to the base~~ (Fig. 19) and after filling the pouch simultaneously with the bonding of the wings heat sealing an upper open mouth of the pouch (Figs. 10, 14, and 16).

Regarding claim 6: wherein in the first step the film is folded so as to form the pouch (Fig. 10), which is closed longitudinally by heat sealing (via 30) overlapping flaps of the film,

Art Unit: 3721

the heat sealing being preferably located at a center of one of two flat faces of the pouch (Fig. 10).

Regarding claim 7: wherein a longitudinal dimension of the pouch is determined by way of transverse heat seals (Fig. 10, via 34).

Regarding claim 8: the heat sealing of the triangles comprises heat sealing of two overlapping sheets of flexible material that constitute the pouch so as to form at the base the two triangles with vertex wedging inside the pouch (Figs. 14-20).

Regarding claim 9: forming ribs during the step for forming the heat sealed triangles, see for example (Figs. 13-20).

Regarding claim 10: during filling of the pouch with product a substantially flat base forms (Figs. 11 and 13).

Regarding claim 11: wherein following the filling step the wings are folded toward the container and are retained thereon (Figs. 19 and 20).

Regarding claim 12: insertion of the heat sealed triangles inside the container by way of pushing means (via 51) which push the triangles from the outside inward (Figs. 19 and 20).

Response to Arguments

Applicant's arguments filed on 5/21/2002 have been fully considered but they are not persuasive.

Applicants argue in pages 3 and 4 of the argument that Schneider's reference discloses folding and bonding of the wings in two different steps while the amended claims calls for folding and bonding of the wings formed in the process to occur without an intermediate step. The examiner believes that Schneider's reference still reads on the applicants amended claim, the

Art Unit: 3721

applicant's amended claim referring to "folding and bonding the wings without an intermediate step..." Schneider's reference clearly showing that folding the wings by 180 degrees (Fig. 19) and then bonding the wings to the base of the bag (Fig. 20) without an intermediate step.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
